The Maryland Center for Health Equity at the University of Maryland is trying to learn more about people’s experiences with flu vaccines and vaccines for other diseases. We want to hear from African American/Black and White, English speaking adults, aged 18 or older.

We would like your input! Please help us answer these questions:

- What do you know about how flu vaccines are made and approved for use?
- What are your thoughts about getting a flu vaccine?
- What are some of the pros and cons of being vaccinated?

Participants will join a 90 minute focus group discussion. You will be paid $30 for your time. Childcare may be provided if requested.

To register for the study, please contact P.I. Sandra Crouse Quinn or a member of our research team at 301-405-1464 or vaccinestudy@umd.edu
