TITLE: Padre Preparados, Jóvenes Saludables: A blended intervention approach to address obesity in Latino families

The well-being of Latino children and adolescents is challenged by overweight and obesity. In 2015-2016, 46% of Latino children and adolescents were overweight or obese, which was the highest compared to other major racial and ethnic groups. Parents are key players in shaping the physical and social/emotional environments that guide eating and exercise behaviors and consequently their children's weight status. Common behavior change techniques to engage parents in promoting healthy behaviors have included providing information regarding lifestyle-health relationships and skills around healthy eating and activity. However, most programs reach mothers, so there are no programs reaching fathers, especially Latino Immigrant fathers.

"Padres Preparados, Jóvenes Saludables" (Padres Preparados) is an 8-session family-skills intervention for Latino fathers and youth (10-14 years) to improve youth energy balance-related behaviors, and paternal parenting practices with the goal of obesity prevention. A total of 5 sessions were provided in-person and 3 through a mobile application (app).

The development of the app used participative and mHealth principles with feedback from a parent advisory board, participants, educators, and multimedia experts. The App content follows an active learning cycle, including: didactic (using videos), reflection, skill building, family plan, and follow-up text messages. We are in pilot phase.

##### III.E.3. Guest Lectures (*Presented in traditional classes or for someone else's program*)

##### III.E.4. Extension Signature Programs

The University of Maryland Extension chose the HILI to receive the UME Signature Program designation for the Smart Choice-Smart Use Health Insurance™ program. University of Maryland Extension—Bonnie Braun, Virginia Brown, **G. Ali Hurtado**, Jesse Ketterman, Lynn Little, Lisa McCoy, Teresa McCoy, Sarah Radice, and Chenzi Wang. University of Delaware Cooperative Extension—Maria Pippidis.

My role in this program was to further develop & adapt the program content in Spanish. The approach and some content changed. The content is available via youtube:
