Technical Reports

APA Journal Article Reporting Standards on Race, Ethnicity, & Culture (JARS-REC). (2023). The JARS-REC are designed to address persistent problems addressing race, ethnicity, and culture in publishing psychological research and evaluation of such research by manuscript reviewers and journal editors. <https://apastyle.apa.org/jars/race-ethnicity-culture>
<https://apastyle.apa.org/jars/rec-table-1.pdf>

I selected the members of the work group from a national pool of applicants. The work group members were nationally recognized experts in psychological research on race, ethnicity, & culture. As the lead APA staff member, I provided content expertise, logistical support, and technical support to the work group throughout the project. As a content expert, I incorporated feedback from the workgroup on various drafts.

APA Task Force Report on Promotion, Tenure and Retention of Faculty of Color in Psychology. (2023). Served as the staff lead for the Task Force responsible for the literature review, development, & execution of the report. Partnered with the co-chairs and members of my team to draft the report. Completed the final editing on behalf of the Association. Final products included two companion documents to facilitate dissemination and uptake of policy recommendations.
