

Name: _____ UID: _____

E-mail: _____

Specialization: Self-Tailored Social Epidemiology Environmental Epidemiology

Faculty Advisor: _____ # Required Hours: 64 (beyond prerequisites – 15)

Admitted: _____ Expected Graduation: _____

During the first semester of enrollment, students must process all requests for waivers. Every semester, students must submit to the graduate program coordinator an advisor-approved plan for completing coursework up to the qualifying exam. Students and advisors should retain a copy of the plan. Students will NOT be cleared to register without the signed program plan.

**Date of Program Plan
Currently on File:**

--

ADVISOR: Your initials and date here indicate your approval of the coursework plan below, **and** your permission to clear for registration.

Date:

Students admitted to the PhD program who have not completed previous coursework in human biology or physiology, demonstrated proficiency in statistical methods and statistical software, and do not have prior research presentation or publication experience must fulfill these requirements at the beginning of their program of study.

Previous Human Biology/Physiology Coursework

Proficiency in Statistical Methods & Software

Research Presentation and/or Publication Experience

Prerequisites (13 credits)

Students entering the program without having completed these courses must do so at the beginning of their program of study to gain competency in these content/method areas.
